Subject: Please Support the Consensus Plan -- FCC WT Docket #02-55

Commissioner Jonathan S. Adelstein
Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear Commissioner Adelstein,

Emergency response communications have never been more critical, or more difficult.

That's because of a common problem on police, fire and EMS radios: interference. Interference, garbled or dropped communications, inhibits first responders from doing their jobs safely and effectively. Essentially, if first responders can't communicate, they can't help and may themselves be in danger.

There is a solution before the FCC: the Consensus Plan. Over 300 public safety organizations, local governments, and congressional officials support this Plan because it eliminates interference before it occurs and at no additional cost to federal, state or local budgets - or the American taxpayer.

The 300 Consensus Plan supporters that have filed with the FCC, along with John Walsh, host of America's Most Wanted, recognize the importance of communications for America's police, fire and EMS workers. This problem has existed long enough, and our first responders deserve better. I am asking you to help.

Please listen to the voices of public safety. Our neighborhoods, families and fellow public safety professionals cannot afford to wait any longer.

Sincerely,

Brenda Harless

Commissioner Jonathan S. Adelstein
Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear Commissioner Adelstein,

this is an unfair advantage to the sole interferer NEXTEL. they are the ones causing all the interference not other radio licensees. Motorola has submitted a plan that resolves it thorough technical solutions. the consensus plan does not show it will work. it will devalue the licenses of other 800 mhz licensee holders. Nextel has created this problem and needs to correct it through the technical solution Motorola provided. If anyone else was creating this problem the FCC would seize the equipment and fine the person causing the interference. If you choose the consensus plan there will be lawsuits for years to come. try the technical solution first, then if for some reason it doesnt then consider something else.

I am a tax payer and don't think it's right that our law enforcement have problems to do the job they swore to do. I think that the cell phone towers should be moved. If something were to happen to me or a loved one I would hope there would be no problem for them to radio for backup or help. With the towers in the way there is no telling if they would be able to or not so please do something about this problem.

Emergency response communications have never been more critical, or more difficult.

That's because of a common problem on police, fire and EMS radios: interference. Interference, garbled or dropped communications, inhibits first responders from doing their jobs safely and effectively. Essentially, if first responders can't communicate, they can't help and may themselves be in danger.

There is a solution before the FCC: the Consensus Plan. Over 300 public safety organizations, local governments, and congressional officials support this Plan because it eliminates interference before it occurs and at no additional cost to federal, state or local budgets - or the American taxpayer.

The 300 Consensus Plan supporters that have filed with the FCC, along with John Walsh, host of America's Most Wanted, recognize the importance of communications for America's police, fire and EMS workers. This problem has existed long enough, and our first responders deserve better. I am asking you to help.

Please listen to the voices of public safety. Our neighborhoods, families and fellow public safety professionals cannot afford to wait any longer.

Sincerely,
